Projects

For 7 years I'm participated in 17 big projects, 217 html projects, made 35 websites on different platforms. Some examples:

Moscomsport

MIAS (under construction from 2013)

<http://app.mias.co/calendar/> - medicine system for olympic medicine centres in Russia (this system only for internal using, not public. Thats why I can show only test stend, but not real working system. I can give login/password only by personal request)

My job on this project:

- » *CSS3(LESS) & HTML5 markup of all design*
- » *JavaScript (Backbone.js, Marionette.js)*
- » *80% of design not my, but many small things made by me, like UI for forms, tables and other*

3.14Lab

EAMY (2014)

<http://eamy.org/> - open source solution for healthcare industry

My job on this project:

- » CSS3(LESS) & HTML5 markup of all design with many interesting css tricks
- » Google Fonts
- » SVG animation
- » JavaScript (jQuery)
- » Compile website (Grunt, Assembla)
- » Upload website (on GitHub Pages from GIT by python script)

My own small projects on PHP (2010)

<http://ru.screen4you.net/>, <http://www.shirokoformatnye-obo.ru/>

My job on this projects:

- » Design and illustration (Photoshop)
- » My own CMS (PHP)
- » HTML, CSS markup
- » JavaScript animation (jQuery)
